ABOUT US

Eagle Battle is a Blockchain Project that is set to go on full throttle with its in-house NFTs, Tokens, Exciting games and whatnot. We tend to create a blockchain atmosphere where everyone should be able to enjoy the transition that this world has seen from orthodox methodologies to technology.

Based on one of the World's Fastest Growing Blockchain, Binance (BNB), we are the Next Big Thing the Cyber world has ever seen. Eagle Battle is your Gateway into the World of Cryptocurrency. With Our NFT, You'll be able to Enjoy Our Upcoming Experience Rich Games and we will also be Launching our Own In-House Crafted Eagle Battle Token or EBT. Currently Listed on OpenSea, we have planned even bigger things that your mind can adhere to. Different Sets of games will have different NFTs and Different NFTs will have different Purposes; providing uniqueness and meaning to your individual purchase. Are you ready for This Deadly Battle? Because Our Eagles Are Ready to Fly!

OUR MISSION

To penetrate the tech-backed market of the world of crypto and blockchain with reliable, secure, and ultra-fast NFTs and tokens. Eagle Battle, as the name suggests, is one of the highly aggressive modelled crypto projects with a mission to make everyone believe in the element of fun with blockchain.

Lined up for a launch pretty soon, we will make the atmosphere where you can play and earn at the same time. Our Eagles are eager to fight, you just have to click a button and win exciting prizes in the form of our NFTs and tokens which you can then redeem into your own bank account.

OUR VISION

With a vision stronger than a plank of concrete, we stand strong with our ethics and values and understand the need for some stress-relieving elements in the world of blockchain and cryptocurrency.

Through our eco-system of blockchain, we want to integrate fun into the industry through our addictive online games and at the same time our algorithms will enable you to earn, possibly a side income. Creating an era of play-and-earn through blockchain.

WHAT ARE **NFT'S**?

Non-Fungible Tokens also abbreviated as NFTs, what exactly are they? We are not just here to discuss the full forms but to tell you the exact meaning of NFTs and how you can easily distinguish between an NFT and Tokens/Crypto coins. Let's get started.

Anything that can be distinguished with a unique code in the cyber world is an NFT. Every NFT has their own verified digital signature which can't be replaced or traded in its entirety. NFTs are Non-Fungible secure and ultra-fast assets based on the blockchain which can't be used as a currency but they possess ownership in the real-life world.

DIFFERENCE BETWEEN NFT & TOKEN/COIN

FUNGIBLE

Have you ever wondered why tokens are also called crypto coins or cryptocurrencies? It is merely because of the fiscal value they hold in the real world. Currencies are fungible meaning that they can be traded in the real-life world and the concept of ownership is not there. This is not the case with NFTs as they are non-fungible and precisely unique.

STORE OF VALUE

This is something that their names automatically imply. Tokens/coins are currencies which have a store of value and are highly liquid. Not as liquid as cash but somewhat within the ranges. NFT holds a value that is beyond economics, it is not liquid and falls into the hard asset class.

MEDIUM OF PURCHASE

For purchasing Non-Fungible Tokens or NFTs, you generally need to go with some of the cryptocurrencies currently in circulation. But in the case of Cryptocurrencies/tokens, you can buy them with actual monetary currency.

TOKENIZATION

Eagle Battle is not only about NFTs and Crypto Sphere but we also have our in-house coin crafted just for the lovers of blockchain. Most of the Gen-Z blockchain-based startups focus on the visual element of their coin, where manipulation is done through aggressive logos and technical language.

But here in Eagle Battle, we believe in practicality. Eagle Battle Token or EBT Coin is based on the fastest growing Binance Blockchain (BNB) which provides ultra-fast transactions and security with utmost trust on board.

WHAT ARE THE USES OF EBT?

In-Game Uses- EBT Coin will have numerous in-game uses on our platform. Upcoming with a pool of card games, you will be able to play and earn through EBT coins.

Long-Term Asset- EBT Coin has the potential to grow your money as fast as the blink of an eye. Hold EBT for the long term and with our projects lined up, your future seems bright.

Multi-Chain Support- Future Collaborations will include the Native Eagle Battle Coin on All the Popular Listing Platforms and Exchanges. You Will Get a Monetary Upgrade every time our Coin Gets Listed on a Different Platform. Hence Proving, You Grow. We Grow.

PRESALE DISTRIBUTION

Providing for the family is something that we all love doing because if our family is happy, the environment gets healthy and joyful automatically. Just abiding by this formula, we are announcing our presale exclusively for the family of Eagle Battle Club on 21st January 2023.

The total supply of EBT Coin or Eagle Battle Tokens will be 100 Million or 100,000,000. Out of which 30% of the coins will be given to the Eagle Battle Family as our token of appreciation for joining the community that has the capability to change how blockchain-based games operate.

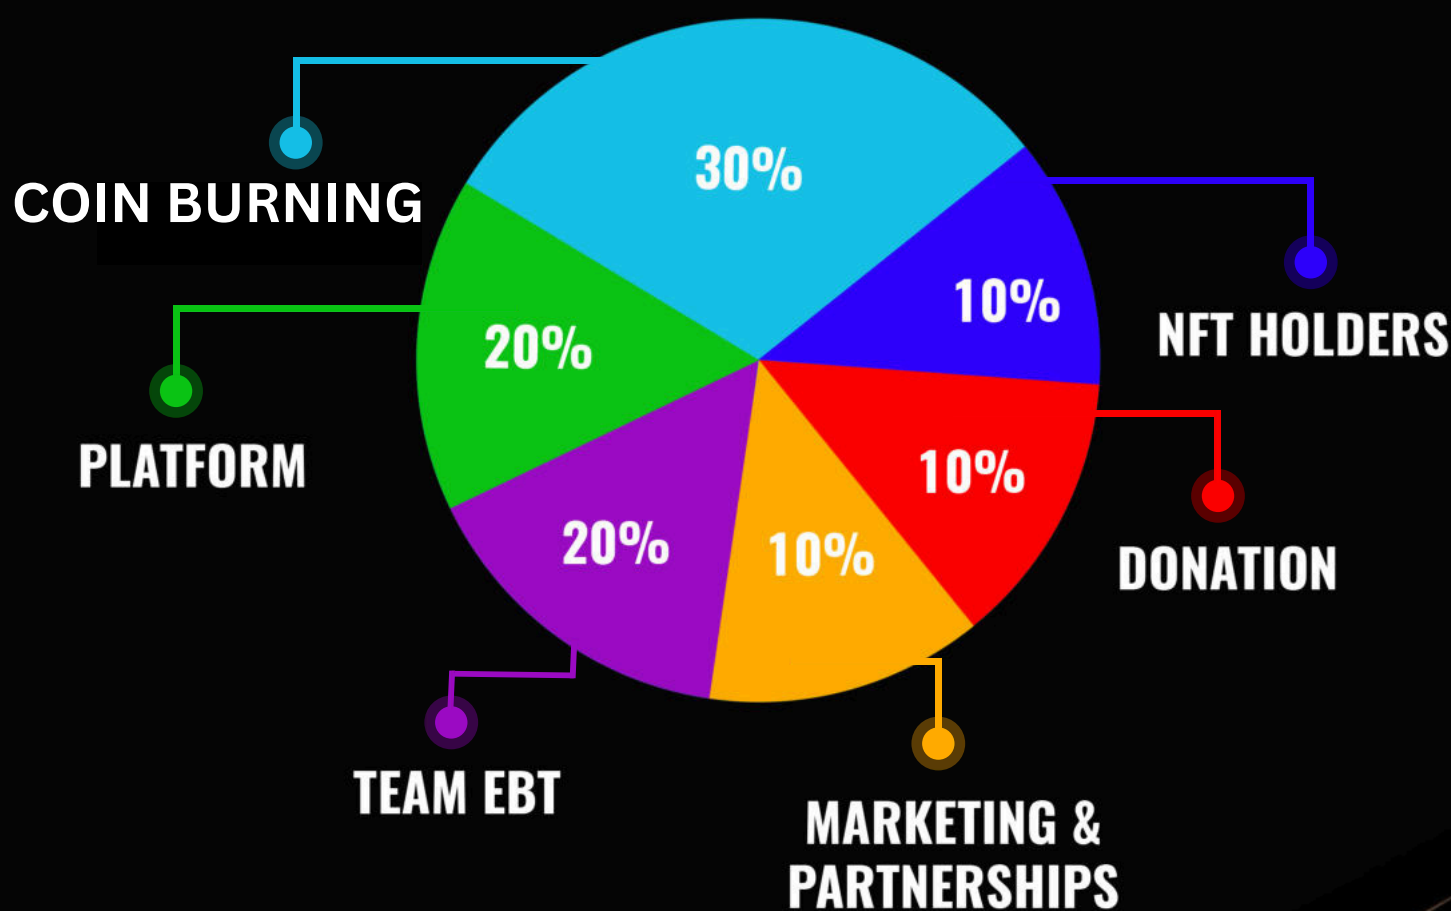

You as a member of the community will get 100 EBT Coins or Eagle Battle Tokens per account which you can use as per your need or you can also redeem in your Metamask Wallet. Now the main question arises, read on!

COIN ALLOCATION

Eagle Battle Token or EBT Coin has been rising with its wings in full swing. We have been working day and night to give life to this project and transparency is something that we believe in. Not only our ethics, but we want you to know about how the EBT Coin is going to be distributed in the future.

Total Supply:- 100 Million/100,000,000

WHY DID WE CHOOSE BINANCE [BNB] ?

How Do Cards Work in Eagle Battle?

If we ask you about the initial phase of your interest in the world of Cryptocurrency, what's the first name that you saw in this industry? Most of you would be greeted with Binance. Not only is our choice for the perfect blockchain Binance (BNB), but it is also the World's largest cryptocurrency exchange in the world by volume.

MOST RELIABLE

Being the best in the industry sure does give you some superpowers, even more, powerful than your competition. Binance is the Google of the Crypto industry. Just like everyone trusts Google to be their trusted source, Binance is the most reliable option available in the market currently.

ULTRA-FAST TRANSACTIONS

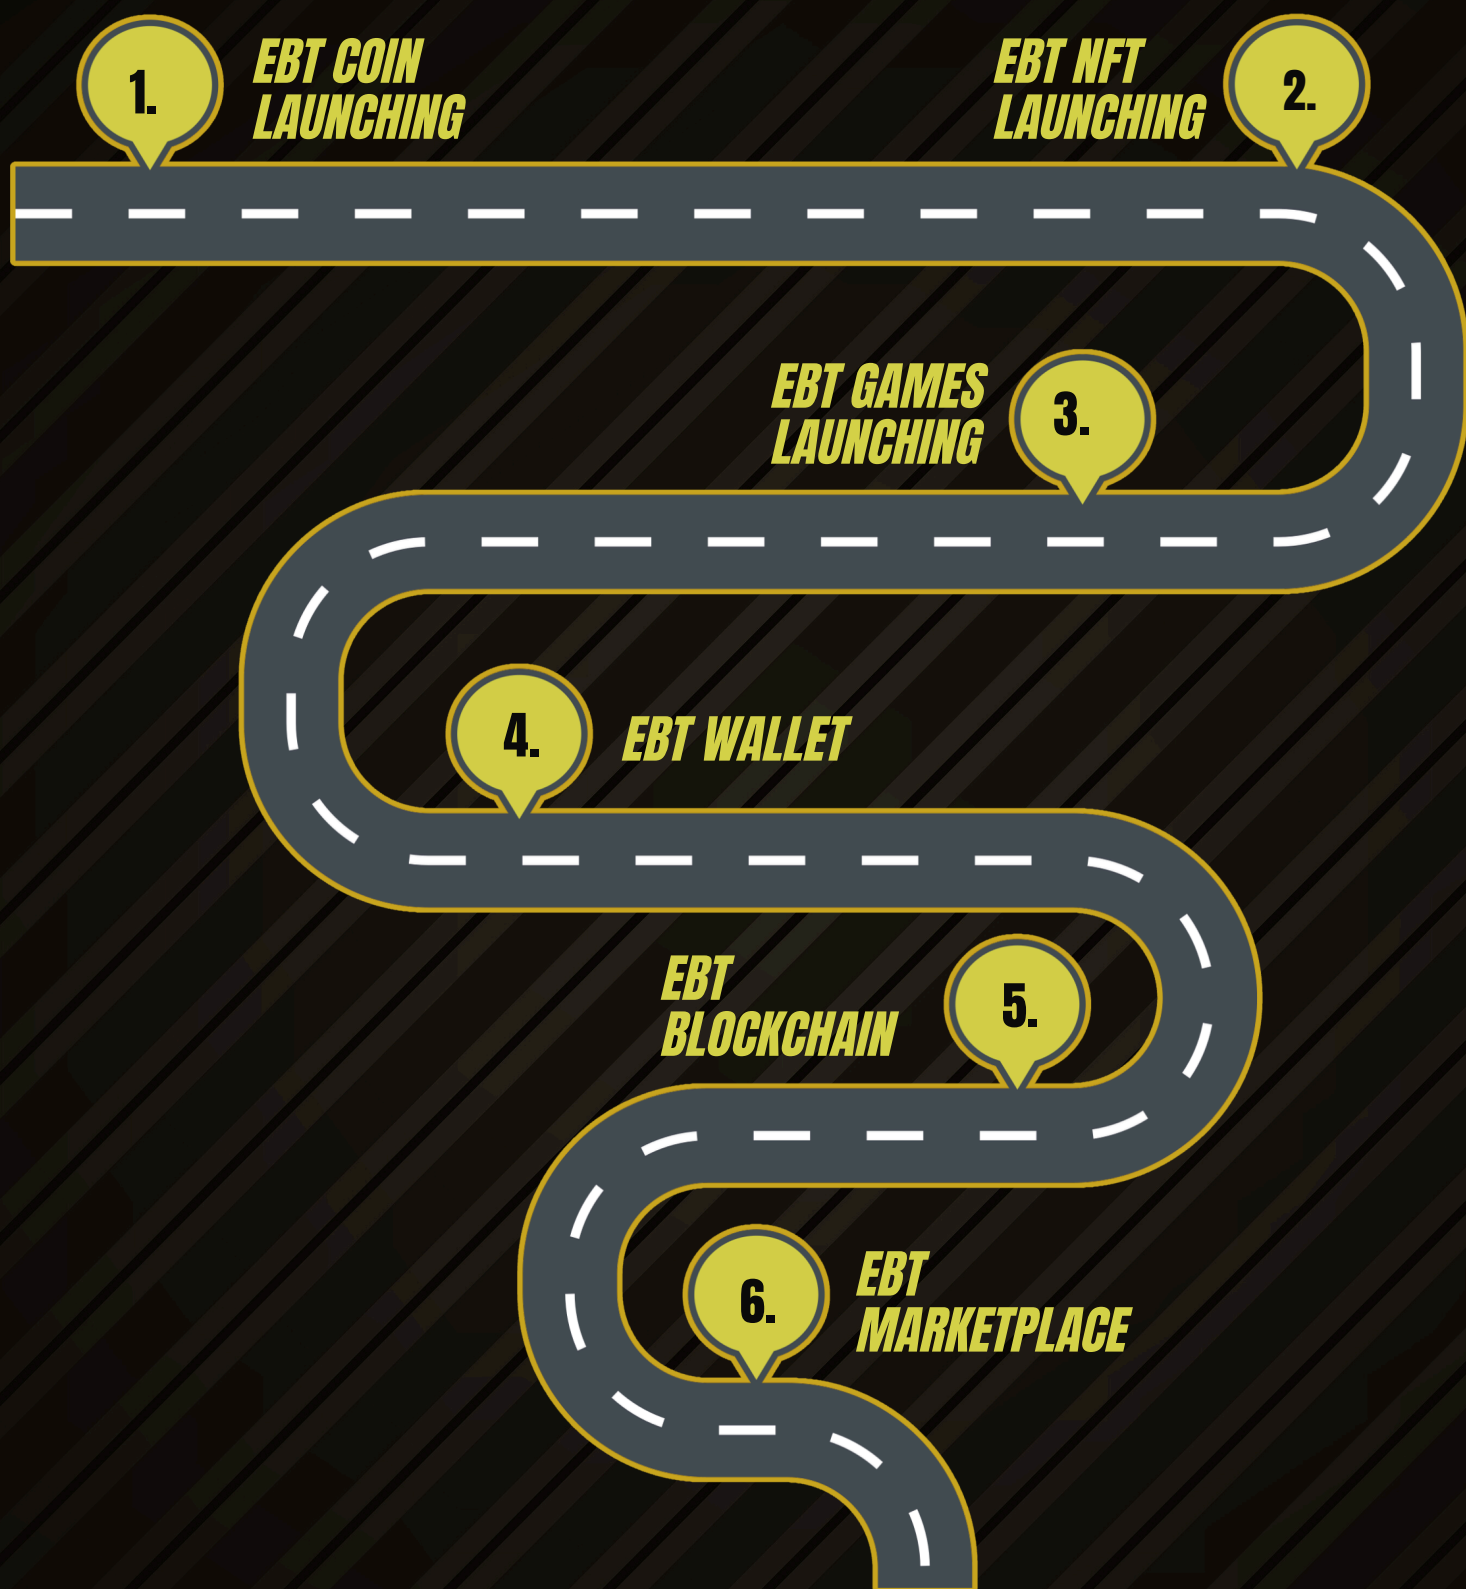

The biggest cryptocurrency mogul also has the best resources and expertise required for sustaining that trust that we just talked about. Ensuring a high volume of transactions every day, BNB also facilitates Ultra-Paced transactions making sure consumer satisfaction is always on top.

THE ECO-SYSTEM

Binance is known for one thing that is its rich user experience and the integration that they provide. Blockchain is all about moving forward and Binance provides the perfect ecosystem for the same. BNB Blockchain ensures fluid transactions, payments, and trading.

HOW FAR WILL THE EAGLE FLY ?

SIGNIFICANCE OF IN-GAME NFT CARDS

How Do Cards Work in Eagle Battle?

With a focus to make you stress-free, the primary motive of Eagle Battle will be to entertain you in such a way that you find fun in technology. All these years, blockchain has only been linked with cryptocurrency, which can sometimes be boring.

What if you don't like investment-related content all the time? Well, we are here as your one-stop-relaxing and gaming station to make bets that you will remember for the rest of your life. As you just saw, 8 card games are planned to go live by the end of this year.

In these games, each card is said to be of a value set by our expertise algorithms and will be defined as our Non-Fungible Token (NFT), which you can mint through Opensea portal. But this is where it gets interesting. Each card will have its own significance and characteristics. Let's take a look at some of the bifurcations of our in-house gaming card NFTs

ROYAL CARDS

These are the top-tier cards and are valued the highest by our algorithms. Can you guess which cards are we talking about here? You may not be able to guess it because they are mostly ignored in card games like 3-Patti; they are none other than Royal Cards

JOKER CARDS

Rarity is not only found in the **Joker** cards but we also have some cards that lie just below the Joker tier. These are the rare cards and can be only found rarely flying high in the sky. Have you already taken a guess? Well, these are the Aces. They will be priced just below the Joker cards but higher than the next category.

COMMON CARDS

Except for Aces and Jokers, the algorithms have been set to rank the Royal and Joker cards above all. But don't be disappointed if you've purchased common cards as once in a while, the prices of common cards are also going to get hiked. So, Beware you may be getting a large amount in your bank account!

HOW TO BUY EAGLE BATTLE?

FOR NFT 'S

-  Our NFTs will give you an advantage even if you're not playing. Refer to the whitepapers for the same.
-  For buying NFTs, you may need to do the same from the official portal of Open Sea.
-  Visit here www.eaglebattle.io

FOR EAGLE BATTLE TOKEN /EBT COIN

-  After being greeted with the landing page of our website, click on Signup/Login.
-  Now that you've signed up, click on login with the required credentials.
-  After signing in, you will be now taken to your profile page where everything pertaining to your account will be visible clearly.
-  Click on the Buy/Sell yellow tab.
-  You need a Metamask Wallet for buying EBT Coin.
-  Link your wallet with Eagle Battle and now you will be able to buy/sell EBT Coin flawlessly.

PRICING

ARE EAGLE BATTLE EXPENSIVE ?

Now the main question comes, what would be the pricing and how will the distribution take place amongst the bet holders? Pricing is something that we think should be aggressively positioned to attain the utmost user satisfaction.

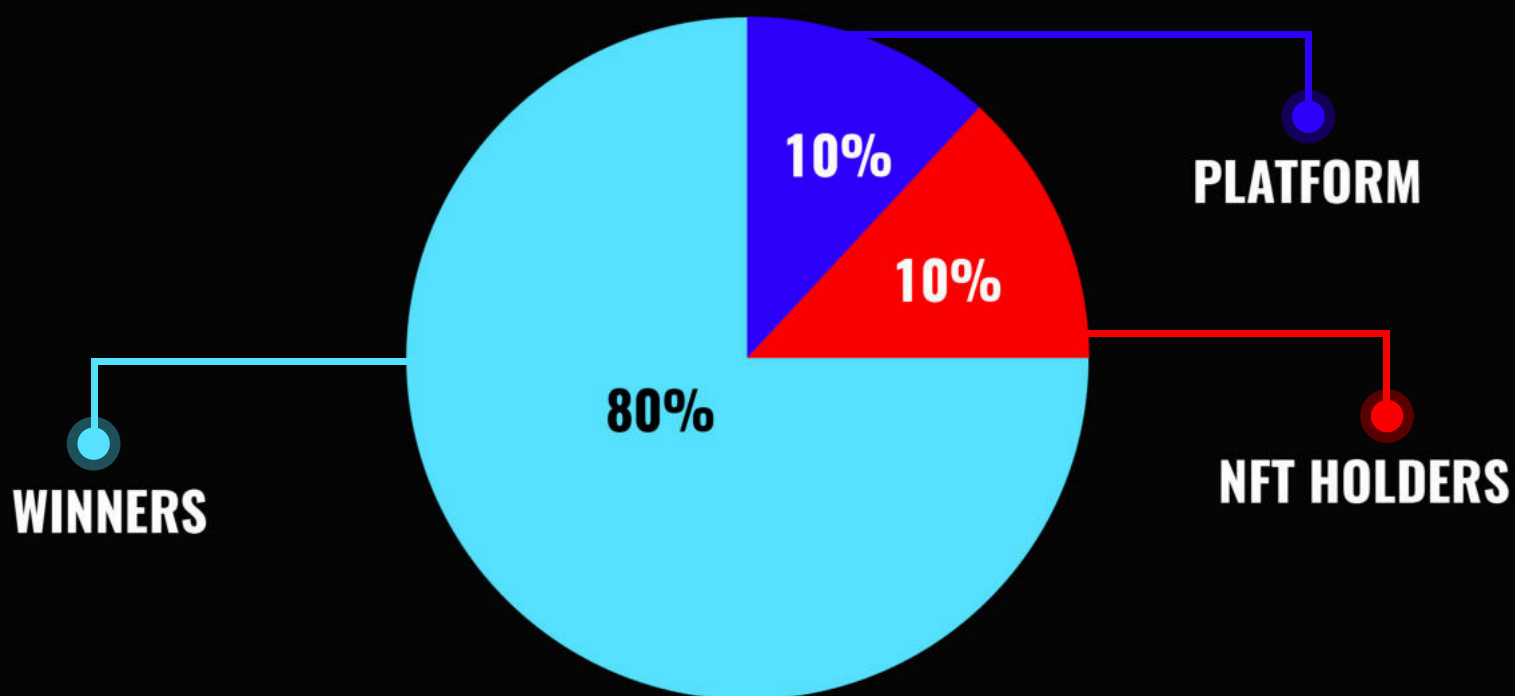

As Eagle Battle is based on Binance (BNB) Blockchain, we have managed to take price and supply in the same pathways. The listing price of Eagle Battle Token (EBT) will be \$0.001. With the price in mind, the total supply of Eagle Battle Token (EBT)/Coin will be 100,000,000 or 100 Million.

With our highly-advanced algorithms and a team dedicated to the project, the demand and supply would be two factors that may affect the price prior to or after the launch. As we have discussed the advantages of using the coin in our Cyber Crypto Sphere, you definitely are going to need more of them!

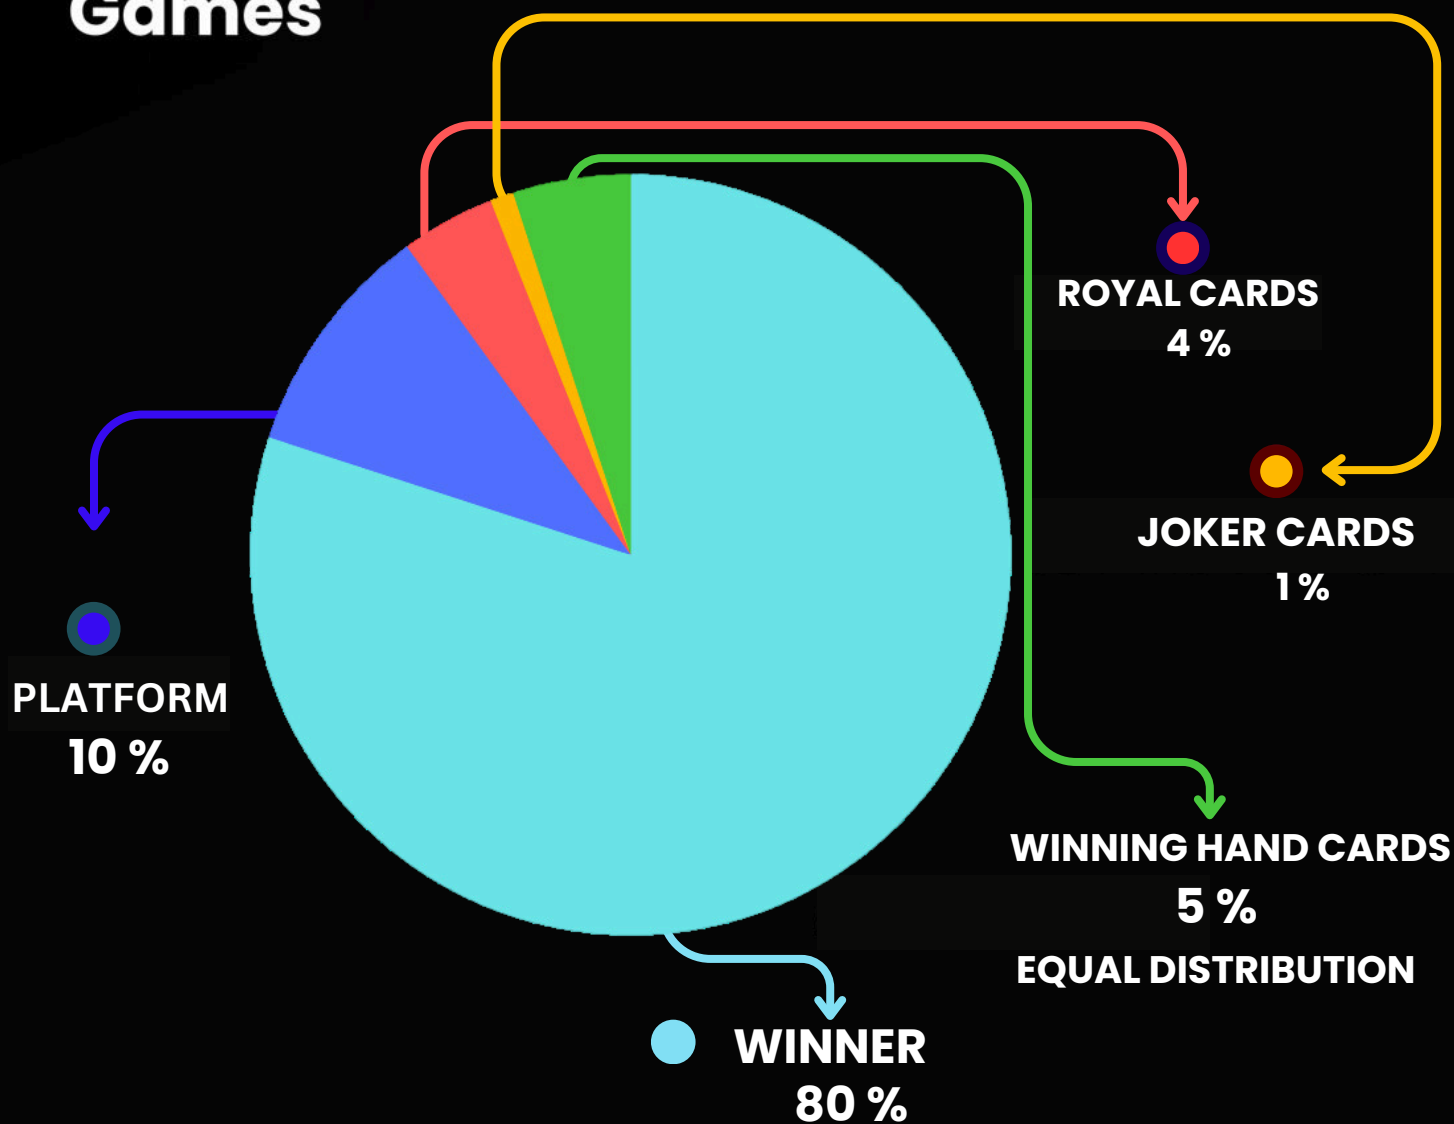

MONETORY DISTRIBUTION

Distribution of Winning Amount amongst the Players for Every Games

Distribution of Winning Amount amongst the Players after Every Games

NOTE :

1 % EQUAL DISTRIBUTION AMONG **ROYAL CARDS**

0.5 % EQUAL DISTRIBUTION BETWEEN **JOKER CARDS**

FUTURE OF PROJECT EAGLE BATTLE

How Far Will The Eagles Fly?

Project Eagle Battle has been launched with a long-term vision. We don't want to make a dent in the industry. We want to mold, weld, and transform the industry to create a CryptoSphere where everybody is unified with the blend of fun and money so perfectly that you don't even know.

With a roadmap of two upcoming years, we are about to work upon our expertise and we will make sure that what we bring to the table is what you seek because, after all, you are the Eagle Club; our family, and our users.

With upcoming Games, NFTs, and Token variations, we will bring everything that speaks of technology and the future to you. Not only this, but we will be launching our multi-chain platform and our own in-house blockchain that our ecosystem will be based on. Not only exciting games and prizes but if you do want to be part of our family, stay with us until we bring a change through blockchain technology.

EAGLE BATTLE

Thank You
